MEMORANDUM FOR: Director of Information Technology

FROM:

Director of Scientific and Weapons Research

25X1

SUBJECT:

Installation of VM Line to Support Intergraph System

25X1

1. This memorandum is to request your assistance in obtaining a communications line between our Intergraph 751 graphics system in 4G21 and the VM1 system in the [redacted]. This line is needed to provide file transfer support for two important projects in the Office. [redacted]

25X1
25X1

2. Our immediate requirement is for the CAPE project sponsored by ORD and delivered to our Science and Technology Division in 1984. [redacted]

25X1

[redacted] Development costs of the system [redacted] including [redacted] to install the Intergraph system and two CAD/CAM graphics workstations. A current effort to redesign the database portion of CAPE requires storage of large textual files on the mainframe with the capability to download files for analysis and graphics production. [redacted]

25X1
25X1

25X1

[redacted] This project will require similar host file support on VM1. [redacted]

25X1

3. [redacted] has told us that there are currently no available bisync lines in the [redacted]. Success of both projects is dependent upon host support, and file transfer capabilities. We would like to meet with the appropriate technical people in OIT to investigate solutions to this problem as soon as possible. Our technical contact is [redacted] secure. [redacted]
